

# Tarea #982: Comandos Utilizados en Bandit (OverTheWire)

## Niveles 0 - 10: Conceptos Básicos de Linux

| Nivel   | Comando Principal                                                    |
|---------|----------------------------------------------------------------------|
| 0       | <code>ssh<br/>bandit0@bandit.labs.overthewire.org<br/>-p 2220</code> |
| 0 -> 1  | <code>cat readme</code>                                              |
| 1 -> 2  | <code>cat ./-</code>                                                 |
| 2 -> 3  | <code>cat "spaces in this filename"</code>                           |
| 3 -> 4  | <code>ls -la</code>                                                  |
| 4 -> 5  | <code>file ./*</code>                                                |
| 5 -> 6  | <code>find . -size 1033c ! -executable</code>                        |
| 6 -> 7  | <code>find / -user bandit7 -group bandit6<br/>-size 33c</code>       |
| 7 -> 8  | <code>grep "millionth" data.txt</code>                               |
| 8 -> 9  | <code>`sort data.txt</code>                                          |
| 9 -> 10 | <code>`strings data.txt</code>                                       |

## Niveles 11 - 20: Criptografía y Redes

| Nivel    | Comando Principal                       |
|----------|-----------------------------------------|
| 10 -> 11 | <code>base64 -d data.txt</code>         |
| 11 -> 12 | <code>tr 'A-Za-z' 'N-ZA-Mn-za-m'</code> |

| Nivel    | Comando Principal                                          |
|----------|------------------------------------------------------------|
| 12 -> 13 | <code>xxd -r, gzip, bzip2, tar</code>                      |
| 13 -> 14 | <code>ssh -i sshkey.private<br/>bandit14@localhost</code>  |
| 14 -> 15 | <code>nc localhost 30000</code>                            |
| 15 -> 16 | <code>openssl s_client -connect<br/>localhost:30001</code> |
| 16 -> 17 | <code>nmap -p 31000-32000 localhost</code>                 |
| 17 -> 18 | <code>diff passwords.old passwords.new</code>              |
| 18 -> 19 | <code>ssh bandit18@... "cat readme"</code>                 |
| 19 -> 20 | <code>./bandit20-do id</code>                              |

## Niveles 21 - 30: Automatización y Git

| Nivel    | Comando Principal                                   |
|----------|-----------------------------------------------------|
| 20 -> 21 | <code>nc -lp [puerto] &amp;</code>                  |
| 21 -> 22 | <code>ls /etc/cron.d/</code>                        |
| 22 -> 23 | <code>`echo I am user...</code>                     |
| 23 -> 24 | <code>cp script.sh /var/spool/bandit24/</code>      |
| 24 -> 25 | <code>nc localhost 30002 (Bucle for)</code>         |
| 25 -> 26 | <code>v (en more) -&gt; :set shell=/bin/bash</code> |
| 26 -> 27 | <code>:shell</code>                                 |
| 27 -> 28 | <code>git clone</code>                              |
| 28 -> 29 | <code>git log</code>                                |
| 29 -> 30 | <code>git branch -a</code>                          |

## Niveles 31 - 34: Finalización

| Nivel    | Comando Principal                          |
|----------|--------------------------------------------|
| 30 -> 31 | <code>git tag</code>                       |
| 31 -> 32 | <code>git add, git commit, git push</code> |
| 32 -> 33 | <code>\$0</code>                           |
| 33 -> 34 | <code>ls -la</code>                        |
